**To:** Recipients of the Feasibility Assessment Report

**From:** SJCHC/PeaceHealth Feasibility Assessment Team

**Subj:** Correction to Hospital Feasibility Assessment Report of Initial Findings

**Date:** June 23, 2008

---

Subsequent to publication of the SJCHC/PeaceHealth Feasibility Assessment Report of Initial Findings, an editing error in the report was called to our attention. In the second paragraph of Page 1 of the Executive Summary, the sentence reading, "It is estimated that by 2015, the population of San Juan Island will increase to more than 11,000" should have read, "It is estimated that by 2015, the population of San Juan Island will increase to more than 8,500." This correction puts the sentence in alignment with the Demographic Profile found on Page 10 in the Market and Demographics section of the report, and reflects the data upon which the modeling was performed.

All of the demographic information used in the feasibility study was correct; this typo in the Executive Summary does not in any way affect the results of the report.

We apologize for the error. If you have any questions, please call Scott Williams, Senior Strategic Analyst for PeaceHealth, at 425/649-3820.
